

BARE BRILLIANT

Final Website Design, Content & Developer Specification

Brand system · exact website copy · page layouts · CTA routes · approved policies · graphic design brief · execution sequence

MEANT, NOT MADE.

Current build scope excludes the engineered Bare Brief. The existing conversation / WhatsApp gateway remains in v1.

One source of truth for design, copy and development

Anything not specified here should not be improvised in production.

- Approval visuals define layout, hierarchy, CTA prominence, card positions and theme transitions. They are layout specifications, not final photography.
- Copy blocks are the exact customer-facing language to implement, except where a policy is explicitly marked for final legal drafting.
- Every CTA has an action and route. If a clickable element is not mapped, stop and map it before coding.
- The deeper Bare Brief questionnaire is intentionally out of scope. All current Start / Talk CTAs use the existing /chat conversation gateway with intent/source parameters.
- The developer should implement reusable CMS slots for campaigns, drops and promotions rather than hard-code one-off banners.

The house in one page

The website should make the customer understand what Bare Brilliant does, why it exists, and why the people behind it know what they are doing.

House signature: MEANT, NOT MADE.

Deeper worldview: SOME THINGS CAN'T BE MADE.

Engagement philosophy: FOREVER IS A VERB.

Positioning: A modern Indian natural-diamond engagement-ring house that starts with the person and the design, then helps the customer understand the diamond and the trade-offs without pressure.

Mission: Create natural-diamond jewellery for rare human connections and the commitments people deliberately choose to make around them.

Personality: Intimate, intelligent, assured, romantic, culturally modern and quietly premium.

Tone: Human first, diamond second. Simple, emotionally precise and observant. Never syrupy, defensive, pushy or artificially urgent.

House rule: We cannot manufacture the relationship. We should never manufacture the sale.

Current palette, refined for a premium light + dark system

The existing dark theme is the hero identity. Light sections are a neutral companion used when product, education or data needs more clarity.

Bare Brilliant · Final Website Design, Content & Developer Specification · Meant, Not Made.

TYPOGRAPHY

Playfair Display + Inter

Keep the existing website type pairing. Use fewer weights, strong hierarchy and generous line-height.

Role	Typeface	Desktop target	Rule
Hero	Playfair Display Regular	72-88 px	Short, emotional, high contrast.
H1	Playfair Display Regular	60-68 px	One clear statement per screen.
H2	Playfair Display Regular	44-52 px	Section-changing ideas.
H3 / Card title	Playfair Display Regular	28-36 px	Never overfill cards.
Body large	Inter Regular	18-20 px / 30-32 line	Editorial explanation.
Body	Inter Regular	16-17 px / 26-28 line	High legibility.
Controls	Inter Medium/Semibold	13-15 px	No thin weights.
Eyebrow	Inter Medium	11-12 px	Uppercase + restrained tracking.

Accessibility / interaction: minimum 44 x 44 px target for touch controls; high contrast; no important copy baked into images; responsive typography must not clip or overlap.

Borrow the discipline, not the aesthetic costume

Bare Brilliant should feel focused, calm and exceptionally considered - not like an Apple clone with diamonds.

- One idea per screen: every scroll section earns its own visual moment.
- One obvious primary action: secondary actions remain visible but never compete.
- Hierarchy before decoration: controls and navigation sit above content without becoming the content.
- Large negative space: premium is created by confidence and restraint, not more cards.
- Precise detail on demand: emotional story first, product/specification transparency exactly when the customer needs reassurance.
- Theme transitions are intentional: dark for emotion / story / immersive 3D; light for product, education, price and specification clarity.
- Motion is slow and scroll-led. Micro-interactions: subtle. Hero helix: signature. No bouncing, confetti, gamification or artificial urgency.
- Reduced-motion and non-WebGL fallbacks are first-class launch requirements.

The same controls everywhere

If a user learns what a button means once, it should mean the same thing everywhere.

PRIMARY CTA - filled ivory on dark / filled near-black on light. Use for the single most important next step.

SECONDARY CTA - transparent with high-contrast outline. Always visible next to or below the primary action.

TERTIARY CTA - text + arrow. Use for editorial navigation, card entry and deeper reading.

Cards - 4-8 px radius, thin divider, large padding, no heavy shadows. Avoid bubbly SaaS-card styling.

Grid - 12 columns desktop, 70 px outer gutter; 48 px tablet; 20 px mobile. Long reading copy max width approx. 640-760 px.

Header - logo left; House navigation centre; Shortlist + Start Your Ring right. Theme adapts to the section background. Header CTA always visible on desktop.

Permanent slots, changing creative

The website should be ready for launches and commercial moments without redesigning the experience every time.

HOUSE NOTICE sits below the header; CURRENT DROP appears after the homepage helix; PRODUCT-LIST INLINE CAMPAIGN appears after approximately 6-8 products. All three are CMS-driven, hidden when inactive, and should never rely on manufactured urgency or default countdowns.

Her job is not to make banners. Her job is to protect the visual world of Bare Brilliant.

The developer owns layout and responsive behaviour; the graphic designer owns production-ready visual assets inside those slots.

- Own homepage/editorial campaign imagery for The Proposal, The Vow, The Chapters and Private Commission.
- Create desktop + mobile campaign heroes for drops, launches, private weeks and seasonal offers using the locked palette.
- Own product presentation crops: front, side, 45-degree, hand, macro, band-pairing and 360 / video poster frames.
- Create ONE OF ONE story assets: reference → sketch → CAD → finished ring.
- Create Why Natural and Diamond Guide educational graphics that simplify rather than decorate.
- Create The Reason comparison graphics that show how budget changes visual outcome.
- Create craftsmanship and The Record assets: CAD, setting, finishing, QC, certification/document presentation.
- Deliver source master + optimised WebP/AVIF export. Essential copy remains live HTML, never baked into artwork.
- Provide separate desktop and mobile compositions; do not rely on one crop.
- Maintain safe zones around jewellery so live headings and buttons never cover the product.

Visual rules: black / ivory / grey first; warm gold only as light or micro-accent. Product remains the brightest object. Real skin and real product detail over generic luxury stock. No fake sparkle overlays, rose-petal clichés, distorted product scale or invented diamond size.

House navigation + guidance + care

Bare Brief is removed from this build. /chat remains the lightweight conversation gateway.

EYEBROW

NATURAL DIAMOND ENGAGEMENT RINGS

HERO

MEANT, NOT MADE.

SUPPORT

Natural diamond engagement rings, made around the person you're choosing.

TRUST LINE

Natural Diamonds · GIA Solitaires · Made to Order · PAN India

HELIX CARDS

THE PROPOSAL - For the moment you ask. And the reason you ask it.

THE VOW - The yes becomes every day.

THE CHAPTERS - The story continues after yes.

PRIVATE COMMISSION - When the piece does not belong in a category.

IMPLEMENTATION NOTES

- Helix stays central. It must never be reduced to a side illustration.
- Scroll rotates cards around the centre natural diamond and focuses one House at a time.
- Mobile uses scroll-snap with diamond fixed near centre and one active House card. Reduced motion = static diamond + four stacked cards.

Homepage - Belief / How We Work / Why Natural

Route: / | Purpose: Move from emotion into a clear operating model, then connect the House philosophy to natural-diamond origin.

THE BELIEF

Some Things Can't Be Made.

We can design the ring. We can refine every proportion. We can source a remarkable natural diamond.

What we can't manufacture is the reason you're buying it.

Chemistry. Timing. The moment one person became different from everyone else.

Bare Brilliant exists to make the ring around that.

HOW WE WORK

THE BRIEF - Who is it for? What does she wear? What should the ring never feel like? What matters most? What are you comfortable spending?

THE DESIGN - We turn those clues into a direction: shape, proportion, setting, profile and the details that make the ring feel specific.

THE NATURAL DIAMOND - Once the design tells us what the centre stone needs to do, we source natural diamonds that make sense for its proportions and your budget.

THE REASON - We tell you what we would choose, what you are paying more for and which differences you are unlikely to see.

THE CREATION - Only after design and diamond approval does making begin.

THE RECORD - Final specifications, independent certification, HUID, invoice and service information stay together.

WHY NATURAL

Origin matters when the symbol does.

Laboratory-grown diamonds are diamonds. Bare Brilliant simply chooses another origin.

For a ring chosen to mark a connection that could not be made to specification either, that origin means something to us.

Meant, Not Made.

Homepage - The Reason / Secret Proposal / Trust / Forever / FAQs / Final CTA

Route: / | Purpose: Demonstrate expertise, reduce proposal anxiety and establish trust before returning to emotion and conversion.

THE REASON

Same budget. Different decisions.

PAPER-FIRST - Higher colour and clarity on paper. Less budget left for visual size or setting.

BALANCED - Protect cut, proportion and visual spread. Relax grades where the difference is unlikely to be visible.
Tag: WHERE WE'D USUALLY START.

SIZE-FIRST - Push visual size while deciding carefully where colour or clarity can move without making the ring look compromised.

There is not one best diamond specification. There is a best decision for the ring, budget and person in front of us.

SECRET PROPOSAL

Keep the surprise. Lose the guesswork.

I KNOW HER STYLE - Send rings she has saved, jewellery she wears or screenshots.

I DON'T KNOW HER SIZE - An existing ring from the correct finger is best; otherwise we help estimate intelligently.

I HAVE A FRIEND WHO KNOWS - Use one trusted person and we will tell you what to ask.

I KNOW ABSOLUTELY NOTHING - Start with her, your budget and your date.

TRUST

Natural Diamonds Only · GIA for applicable centre solitaires · HUID gold · Insured delivery · Approx. 15-day standard creation target · 50% to begin / 50% before insured dispatch · Lifetime exchange & buyback policy.

FOREVER IS A VERB

A proposal happens once. A relationship happens every day after it.

Showing up. Listening. Changing. Repairing. Laughing. Choosing. Again and again.

THE QUESTIONS PEOPLE ACTUALLY ASK US

Will she notice the difference between F and G?

I know her style. I don't know anything about diamonds.

Can you make a ring within ₹1.5 lakh?

How do I find her ring size without asking?

Each question expands inline to a direct, useful answer.

FINAL CTA

You've found the person. Let's get the ring right.

Tell us what you know. We'll help with what you don't.

ABOUT THE RING - STATIC, NOT CLICKABLE

Example: An oval centre stone sits above a clean, restrained band with cathedral shoulders rising into the basket. From above, the ring remains almost entirely about the diamond. From the side, the architecture becomes visible.

WHY THIS DESIGN WORKS

Must be written individually per design. Example: The cathedral shoulders rise gradually toward the centre setting, which makes the diamond feel integrated into the ring rather than simply placed on top of it. The band narrows slightly as it approaches the centre, increasing the diamond's visual dominance without making the ring feel delicate.

WEDDING BAND COMPATIBILITY

State whether a straight band sits closely, leaves an intentional gap or needs a contour band.

ONE OF ONE - Custom Rings

Route: /the-proposal/custom-rings | Purpose: Make custom-ring work design-first. The story should never begin with selecting a solitaire.

HERO

Start with the ring. Not the stone.

SUPPORT

A custom Bare Brilliant ring begins with how it should feel on the hand, what it should say about the person wearing it and the details that make it theirs. Once the design is right, we find the natural diamond that belongs in it.

01 THE STORY

Tell us who it is for, what she wears, what you have noticed and what you never want the ring to feel like.

02 THE DIRECTION

References are welcome. Screenshots, old jewellery, architecture, another ring, a texture, even something unrelated. We look for the pattern behind what you like.

03 THE SKETCH

We begin shaping silhouette, proportion, setting, band and profile before asking a diamond to solve the design for us.

04 THE DESIGN

The chosen direction becomes a refined technical design. We adjust what looks beautiful and what needs to work physically every day.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
DESIGN A RING WITH US	Open conversation	/chat?intent=custom-ring&source=one-of-one	Primary
SEE THE PROCESS	Scroll	/the-proposal/custom-rings#process	Secondary

ONE OF ONE - Diamond + Creation

Route: /the-proposal/custom-rings | Purpose: Complete the custom journey by introducing the natural diamond only after the form is resolved.

05 THE NATURAL DIAMOND

Only now do we search for the centre stone. We look for natural diamonds whose shape, measurements, visual spread and character actually belong in the design - then explain why one earns our recommendation.

06 THE CREATION

Once everything is approved, the ring moves into making, setting, finishing and final inspection.

END CTA

Have a screenshot? That's enough to start.

Screenshots, old jewellery, architecture, a texture, another ring - references are raw material, not rules.

Proposal Rings

Route: /the-proposal/proposal-rings | Purpose: Give secret-proposal buyers a low-anxiety path when they do not want to guess the final ring.

HERO

Ask now. Choose forever together.

SUPPORT

A proposal ring keeps the question yours without forcing you to guess every detail of the final engagement ring.

THE QUESTION NOW

Something considered and beautiful for the moment you ask - without pretending you already know every preference.

THE DECISION AFTER YES

Once you have celebrated, come back together. We will design the final engagement ring around both of you.

NO GUESSING THE BIGGEST DETAILS

You do not need to secretly decide the final carat, setting height, band profile and every other preference alone.

KEEP THE FIRST RING

The proposal ring does not have to disappear. Keep it as the ring from the actual moment, wear it separately or make it part of your story another way.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
EXPLORE PROPOSAL RINGS	Scroll / filter designs	/the-proposal/proposal-rings#designs	Primary

PLAN IT SECRETLY	Navigate	/the-proposal/secret-guidance	Optional inline CTA

Secret Proposal Guidance

Route: /the-proposal/secret-guidance | Purpose: Reduce proposal anxiety using practical, discreet guidance.

HERO

Keep the secret. Keep the decision intelligent.

THE CLUES YOU ALREADY HAVE

Jewellery she wears. Screenshots she has saved. A ring she once pointed at. The metal she chooses most. Her wardrobe. Her Pinterest board. Small clues are often enough to find a direction.

SIZE WITHOUT ASKING

An existing ring worn on the same finger is the best clue. If that is not available, we will work through safer ways to estimate and tell you how much resizing freedom the design allows.

THE ONE FRIEND

If someone close to her genuinely knows her taste, use one person - not five. We will tell you the useful questions to ask.

KEEPING COMMUNICATION DISCREET

Tell us how and when we can contact you. We will not send proposal-breaking messages at the wrong moment.

WORK BACKWARDS FROM THE DATE

Proposal dates matter because design, diamond sourcing, production, QC and insured delivery all need room.

I KNOW NOTHING

Start there. Tell us about her, your comfortable budget and when you are planning to ask.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
PLAN IT PRIVATELY	Open conversation	/chat?intent=secret-proposal&source=secret-guidance	Primary

The Vow

Route: /the-vow | Purpose: Extend the relationship from engagement into wedding bands and couple rings.

HERO

The yes becomes every day.

WEDDING BANDS

Clean, considered bands designed for the part nobody photographs as much: wearing them every day.

DIAMOND BANDS

More light, without competing with the engagement ring.

COUPLE RINGS

Related rather than identical. Two rings can belong together without forcing two people to have the same taste.

DESIGNED BESIDE YOUR RING

Show us the engagement ring - Bare Brilliant or otherwise. We will consider its profile, height and proportions when designing the band beside it.

PHILOSOPHY LINE

FOREVER IS A VERB. A wedding band does not promise that nothing will change. It marks the choice to keep meeting each other through everything that does.

INTERACTION MAP

The Chapters

Route: /the-chapters | Purpose: Create lifetime relationship value through anniversaries and meaningful milestones without diluting the engagement-ring focus.

HERO

Not every milestone needs a ceremony to matter.

ANNIVERSARIES

Not because another year passed. Because of everything that happened inside it.

THE NEW HOME

The first place with both names on the door deserves its own memory.

SHARED WINS

The business worked. The move happened. The difficult year ended. Something finally became yours.

THE NEXT CHAPTER

Some milestones do not fit a category. Tell us what happened. We will help decide what should mark it.

END

What chapter are you in?

INTERACTION MAP

Our House

Route: /our-house | Purpose: Make the customer connect emotionally and logically, then answer why this brand exists and why the founder has the right to advise them.

HERO

MEANT, NOT MADE.

Some things can be designed perfectly. The reason you are here is not one of them.

THE PROBLEM WE SAW
Buying an engagement ring became strangely impersonal. One of the most emotional purchases people make is often reduced to inventory, grades, discount percentages and a salesperson asking how quickly they can close the order. The customer is given more information than ever and somehow feels less certain.

WHAT WE BELIEVE
You can manufacture an image. You can manufacture urgency. You can manufacture a perfect proposal for Instagram. You can even manufacture a diamond. What you cannot manufacture is chemistry, timing or the moment one person becomes different from everybody else.

Meant, Not Made.

WHAT THAT CHANGES
We work only with natural diamonds.
We make around the person, not around inventory.
We explain trade-offs instead of hiding behind grades.
We do not create urgency that is not real.
We show you what you are paying for.
We make only after the decision is clear.

BARE / BRILLIANT
BARE - Strip away the pressure, jargon, fake urgency and things someone is trying to make you want. Start with what matters.

BRILLIANT - The diamond, literally. But also clarity: knowing what matters, understanding the decision and seeing it clearly.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
WHY NATURAL	Navigate	/why-natural	Secondary
START A CONVERSATION	Open conversation	/chat?source=our-house	Primary
A NOTE FROM HARSH	Navigate / editorial drawer	/founder-note	Founder CTA

Why Bare Brilliant Exists

Route: /our-house#why-bare-brilliant-exists | Purpose: Answer why the House exists, then establish the founder as human proof behind the operating philosophy.

WHY BARE BRILLIANT EXISTS

Buying a diamond has never come with more information.

More certificates. More grades. More comparisons. More opinions.

And yet, for something this meaningful, people often walk away with surprisingly little clarity.

Bare Brilliant began with a simple observation:

the customer making one of the most important purchases of their life should never be the least confident person in the room.

So we built the experience differently.

Start with the person. Understand the ring. Explain the diamond. Show the trade-offs. Recommend only what earns its place.

No inventory to push. No manufactured urgency. No pressure to spend more simply because you can.

Just better decisions around something that means a great deal.

HARSH PANDEY - FOUNDER, BARE BRILLIANT

After more than six years working inside India's diamond and jewellery industry, one thing kept bothering me.

Customers were being given enormous amounts of information, but very few people were helping them understand what actually mattered.

I watched people compare colour grades they might never notice, clarity grades they did not need, discounts they could not properly evaluate and dozens of diamonds that only made the decision harder.

The problem was not access to choice. It was knowing whom to trust when making the choice.

I did not want to build another jewellery catalogue. I wanted to build the kind of place I would want on my side of the table if I were buying the ring myself.

That idea became Bare Brilliant.

- Harsh

IMPLEMENTATION NOTES

- Use one small, restrained editorial founder portrait. Do not turn the homepage or product pages into founder-led content.
- The A NOTE FROM HARSH CTA is already mapped on Page 11A and leads to /founder-note.
- No former employer logos, long CV, inflated titles or unsupported gemological credentials.

A Note From Harsh

Route: /founder-note | Purpose: Use the founder voice to make the promise tangible and personal without making Bare Brilliant personality-dependent.

A NOTE FROM HARSH

If you are here because you are planning to propose, there is a good chance you have already spent hours looking at rings and somehow feel less certain than when you started.

That is normal.

You do not need to know diamonds before speaking to us.

You do not need to know whether F is better than G, whether VS1 is worth paying for, or whether 0.90 ct will look noticeably different from 1.00 ct.

That is our job.

Your job is to tell us about the person you are choosing, what you are comfortable spending and anything you have already noticed about what she likes.

We will help with the rest.

And if something costs more without making the ring meaningfully better, I will tell you that too.

That is the kind of company I wanted Bare Brilliant to be.

Harsh Pandey
Founder, Bare Brilliant

Why Natural

Route: /why-natural | Purpose: Explain the House choice without attacking laboratory-grown diamonds or claiming they are fake.

HERO

Because origin is part of the story.

OPENING

Laboratory-grown diamonds are diamonds. Bare Brilliant does not need to deny that to explain its own choice. Natural and laboratory-grown diamonds have essentially the same core diamond material; their growth histories are fundamentally different.

ANCIENT BY ORIGIN

Many natural diamonds are more than a billion years old. Their beginning had nothing to do with the person who would eventually wear them.

SELECTED, NOT PRODUCED TO ORDER

We do not choose the recipe from which a natural diamond forms. We choose from what nature formed - and decide which stone deserves the ring.

INDEPENDENTLY UNDERSTOOD

A grading report tells us measurable things about the stone. It does not make the buying decision for you.

MEANING, NOT SUPERIORITY

Bare Brilliant choosing natural diamonds does not require somebody else's diamond choice to be wrong. This is simply the origin that belongs to our house.

INTERACTION MAP

EXPLORE THE PROPOSAL	Navigate	/the-proposal	Secondary

How It Works

Route: /how-it-works | Purpose: Make the consultation model systematic, expert and design-first.

THE BRIEF

First, we understand the person, the occasion, the budget and what you already know.

THE DESIGN

We establish the ring's direction before allowing a certificate to dominate the decision.

THE NATURAL DIAMOND

We then source centre stones whose shape, proportion and value make sense inside that design.

THE REASON

We explain our recommendation and the trade-offs between the strongest options.

THE CREATION

Approved design. Approved diamond. Then making begins.

THE RECORD

Final specifications, certification, HUID, price information and service details stay clear.

INTERACTION MAP

Process stage	Anchor / expand	/how-it-works#stage-:stage	Optional deeper content

Craftsmanship

Route: /craftsmanship | Purpose: Show the real creation process instead of generic craftsmanship claims.

01 DESIGN APPROVAL

No production begins while the ring is still an idea.

02 CAD & ENGINEERING

The approved direction becomes a buildable ring with proportions, stone dimensions and setting geometry resolved.

03 METAL WORK

The ring body moves into casting and preparation in the chosen precious metal.

04 DIAMOND SETTING

Centre and accent diamonds are positioned and secured according to the final design.

05 FINISHING

Surface, edges, polish and small details are refined by hand.

06 QUALITY CONTROL

Alignment, security, finish, dimensions and specification are checked before release.

07 HUID & DOCUMENTATION

Applicable hallmarking and order documentation are assembled.

08 INSURED DISPATCH

The finished piece leaves only after the final check.

INTERACTION MAP

THE RECORD	Navigate	/the-record	Secondary

The Record

Route: /the-record | Purpose: Turn trust proof into a coherent system.

THE DIAMOND REPORT

Independent grading for the applicable natural centre diamond.

THE HUID

The traceable hallmark identity for your gold jewellery.

THE DESIGN RECORD

Final ring size, metal, design specifications and approved custom details.

THE PRICE RECORD

What went into the price: diamond, metal, making and applicable tax.

THE DELIVERY RECORD

Order timeline and insured dispatch information.

THE SERVICE RECORD

Resizing, repairs or future Bare Brilliant service can stay connected to the piece.

INVOICE REQUIREMENT

Invoice should clearly state each hallmarked article description, net precious-metal weight, purity / fineness and other required details; Bare Brilliant should additionally show diamond and making / tax components for transparency.

ASK ABOUT CERTIFICATION	Open conversation	/chat?intent=certification-question&source=the-record	Primary
SEE HOW IT WORKS	Navigate	/how-it-works	Secondary

Diamond Guide

Route: /diamond-guide | Purpose: Teach only the decisions that materially improve the customer's judgement, then create a focused micro-conversion.

CUT & PROPORTION

Start with what you can see. How a diamond handles light and how its proportions work together matter more than memorising labels.

CARAT

Carat is weight, not visual size. Two diamonds with the same carat weight can face up differently.

COLOUR

Shape and metal change what colour looks like in the finished ring.

CLARITY

Higher grade is not automatically a better buying decision. The useful question is whether the inclusion is visible or affects durability.

SHAPE

Two stones of the same weight can wear completely differently because length-to-width ratio and spread change presence.

CERTIFICATION

Evidence, not a recommendation. A report describes the stone; it does not tell you whether the price and visual trade-offs are right for your ring.

FLUORESCENCE

A factor, not an automatic problem. Evaluate the actual stone rather than rejecting a report line in isolation.

THE QUESTION THAT MATTERS

What should I compromise on for my budget?

My total ring budget is ₹ ____

On-page response: At this budget, we would first protect the design, diamond cut and visual proportion. Then we would look for places where colour or clarity can move without creating a difference you are likely to notice. The exact answer depends on shape and live diamond availability.

MICRO CAPTURE

Want us to apply this to real natural diamonds? Name + WhatsApp. This is a focused lead capture, not the Bare Brief.

FAQs - Choosing the Ring + Natural Diamonds

Route: /faqs | Purpose: Organise questions by the decision the customer is making. Avoid a giant random accordion list.

CHOOSING THE RING - DO I NEED TO KNOW THE RING SIZE?

No. If you can borrow a ring worn on the same finger, that is the best clue. If not, we can help estimate and tell you whether the design has a generous or limited resizing range.

WHAT IF I DO NOT KNOW HER STYLE?

Start with what you do know: jewellery she already wears, screenshots she has saved, the metal she reaches for, her wardrobe, or one trusted friend. We can translate those clues into ring directions.

CAN YOU HELP WITH A SECRET PROPOSAL?

Yes. Secret Proposal Guidance is built for exactly this: style clues, discreet contact, ring-size strategy, proposal timing and design choices without involving too many people.

CAN I CUSTOMISE A DESIGN?

Yes. Any Bare Brilliant engagement design can be adapted within technical limits. If you want no catalogue starting point at all, ONE OF ONE begins from the story and the design.

NATURAL DIAMONDS - DO YOU SELL ONLY NATURAL DIAMONDS?

Yes. Bare Brilliant works exclusively with natural diamonds.

ARE THE DIAMONDS CERTIFIED?

Applicable centre solitaires are independently graded, with GIA used for centre solitaires in the current House standard. Smaller diamonds may use other applicable independent documentation as specified on the order.

WHY GIA?

Because an independent report creates a common factual language for characteristics such as carat, colour and clarity. We still judge whether the actual stone and price make sense for the ring.

CAN I SEE THE DIAMOND BEFORE SETTING?

Where sourcing and availability allow, yes. We can share detailed images/video and the independent report before final approval; physical viewing may not always be practical for every sourced stone.

FAQs - Ordering + Aftercare

Route: /faqs | Purpose: Contractual answers reflect the approved current commercial policies.

ORDERING - HOW LONG DOES IT TAKE?

Standard made-to-order pieces currently target approximately 15 days after final design, diamond and specification approval. Complex ONE OF ONE and high-jewellery commissions receive a separate timeline.

WHAT IS THE PAYMENT STRUCTURE?

50% of the approved order value is paid to begin the order. The remaining 50% is due before insured dispatch.

DO YOU SHIP ACROSS INDIA?

Yes. Bare Brilliant ships PAN India using insured high-value logistics.

HOW IS THE JEWELLERY INSURED?

Orders travel through approved insured jewellery logistics. Tracking and client communication continue until handover.

AFTERCARE - RESIZING

One complimentary resize is available once within 90 days, subject to the design's safe resizing range. Designs with limited or no resize range must say so before purchase.

REPAIRS

Send photographs and tell us what happened. Bare Brilliant will inspect the piece and explain the appropriate repair and any charge before work begins. Verified manufacturing defects are covered by the lifetime manufacturing warranty.

BUYBACK

Lifetime cash buyback: 100% of prevailing assessed precious-metal value + 80% of prevailing assessed natural-diamond value, subject to inspection, eligibility and documentation. Making charges, GST, original discounts and non-recoverable service costs are excluded from material value.

EXCHANGE

Lifetime exchange: 100% of prevailing assessed precious-metal value + 90% of prevailing assessed natural-diamond value, subject to inspection, eligibility and documentation.

IMPLEMENTATION NOTES

- Formal policy pages remain the source of truth if a short FAQ summary and legal policy ever conflict.

Shipping & Delivery

Route: /shipping-delivery | Purpose: Separate creation time from transit time and reinforce insured delivery.

01 FINAL CONFIRMATION

Your approved design, natural diamond, ring size and order value are locked before production begins.

02 CREATION

Standard made-to-order pieces currently target approximately 15 days after final confirmation. Complex custom and high-jewellery commissions receive a separate timeline.

03 FINAL QC

The piece is checked against its approved specification before dispatch.

04 THE RECORD

Certification, HUID and order documentation are prepared with the finished piece.

05 INSURED DISPATCH

Your order travels through approved high-value insured logistics after the remaining 50% balance is paid.

06 DELIVERY

Tracking and client communication continue through final handover.

The engineered Bare Brief is on hold

Do not build the multi-step questionnaire in this website phase.

Current behaviour: all Start Your Ring / Talk / Advice CTAs use the existing /chat gateway with intent, source, product and other context parameters where useful. The deeper qualification journey will be engineered only after the main website is stable and live.

Developer rule: do not create placeholder steps or dead forms pretending the Bare Brief exists. Keep the /chat gateway clean, fast and trackable.

Confirm Your Selection

Route: /confirm-selection/:draftId | Purpose: Replace generic checkout language with a premium made-to-order approval moment.

SELECTION SUMMARY

Ring image · design name · metal · ring size · centre diamond · GIA report number where applicable · centre-stone dimensions · accent diamonds · engraving / custom details · expected creation target.

PRICE BREAKUP

Centre diamond · accent diamonds · metal · making / crafting · GST · total.

PAYMENT

50% advance to begin. Remaining 50% before insured dispatch.

CONFIRMATION

Checkbox: I have reviewed the design, diamond and final specification.

Returns

Route: /returns | Purpose: Provide confidence for eligible standard pieces without pretending bespoke commissions are ordinary stock products.

7-DAY CONFIDENCE WINDOW

Eligible standard Bare Brilliant pieces may be returned within 7 calendar days of delivery, subject to inspection.

ELIGIBLE STANDARD PIECE

A standard Bare Brilliant design without bespoke structural modification or engraving, returned unworn except reasonable try-on, unaltered, with original packaging, certification and documentation, and passing Bare Brilliant QA.

REFUND

Eligible returns receive a full refund of the eligible order value after the returned piece is received and passes inspection, returned through the approved payment/refund process.

NOT ELIGIBLE FOR CHANGE-OF-MIND RETURN

ONE OF ONE custom rings · private commissions / high jewellery · engraved jewellery · pieces structurally modified to the customer brief · pieces resized after delivery · jewellery altered or worked on by a third party.

SEPARATE PROTECTION

Manufacturing defects, wrong-item delivery and transit damage are handled separately from change-of-mind returns.

REVERSE LOGISTICS

Bare Brilliant arranges insured reverse pickup for approved returns. Customers should not send high-value jewellery using an ordinary self-selected courier.

LEGAL STATUS

Business-approved policy direction; final legal wording, refund timing and cancellation terms require legal review before publication.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
START A RETURN	Open return request	/chat?intent=return&source=returns	Verify order and eligibility before pickup
TALK TO US	Open support	/talk-to-us	Secondary

Lifetime Manufacturing Warranty & Resizing

Route: /warranty-resizing | Purpose: Make long-term support clear without implying accidental damage is a manufacturing defect.

LIFETIME MANUFACTURING WARRANTY

Bare Brilliant warrants the piece against verified manufacturing defects for its lifetime.

NOT COVERED

Normal wear · surface scratches · accidental impact · bent or damaged prongs caused by trauma · loss / theft · damage from improper handling · damage or relevant alteration caused by third-party repair / modification.

MANUFACTURING-DEFECT PROCESS

Bare Brilliant inspects the piece before confirming whether the issue falls under warranty. Covered manufacturing defects are repaired without a manufacturing-repair charge under the final service policy.

ONE COMPLIMENTARY RESIZE WITHIN 90 DAYS

Available once, subject to technical feasibility and the safe adjustment range of the design.

DESIGN DISCLOSURE

Every ring page should say Resizable: Yes / Limited / No, with the permitted range where possible.

ADDITIONAL RESIZING

Additional or later resizing can be assessed and quoted case by case.

LEGAL STATUS

Business-approved commercial policy; final warranty legal wording should be reviewed before public launch.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
REQUEST WARRANTY SERVICE	Open typed service request	/chat?intent=warranty&source=warranty-resizing	Primary
REQUEST RESIZE	Open typed service request	/chat?intent=resizing&source=warranty-resizing	Secondary

Privacy

Route: /privacy | Purpose: Create a plain-language privacy layer and a formal policy that reflects the actual data flows of the live site.

HERO

Your story is not ours to misuse.

PUBLIC SUMMARY

Explain what Bare Brilliant collects, why it is needed, how it is used and what choices the customer has.

WHAT WE COLLECT

Contact details · enquiry context · product preferences · shortlist / consultation data · transaction and service data · necessary technical / analytics information.

WHY WE USE IT

Respond to enquiries · personalise recommendations · fulfil and service orders · operate and improve the website · fraud/security · marketing only where permitted and appropriately notified.

DATA-MINIMISATION RULE

Do not collect a third party's phone number simply to share a shortlist. Do not collect full delivery address at the first enquiry stage.

CUSTOMER CHOICES

Provide clear contact-preference controls and applicable mechanisms for correction, deletion or consent withdrawal.

DEVELOPER REQUIREMENTS

Consent / notice state stored with lead where needed; source and purpose logged; retention and vendor/processors documented internally; analytics/cookies disclosed appropriately.

LEGAL STATUS

Final privacy policy must be reviewed against the Digital Personal Data Protection Act / Rules and the actual production data architecture before launch.

INTERACTION MAP

Visible CTA / control	Action	Exact route / behaviour	Developer note
CONTACT PRIVACY	Open privacy contact route	mailto:privacy@barebrilliant.com or support form	Final address to be confirmed
READ FULL POLICY	Anchor / long legal copy	/privacy#full-policy	Formal counsel-reviewed policy

Terms & Conditions

Route: /terms | Purpose: Put the commercial basics in plain language before the formal legal text.

ORDER & PAYMENT

50% advance to begin. Remaining 50% is due before insured dispatch.

MADE-TO-ORDER WORK

Final design, specific diamond, ring size / specification, order value and target timeline are approved before creation begins.

PRICE

Show taxes and price breakup transparently. Dynamic made-to-order pricing is based on the approved final configuration.

RETURNS / SERVICE

Link to the approved Returns, Warranty & Resizing, Buyback & Exchange and Shipping pages. These linked policies form part of the customer terms.

REQUIRED LEGAL DISCLOSURES

Legal seller entity · registered / business address · support and grievance contact · payment and order-acceptance terms · cancellation terms · returns and custom-order exclusions · shipping · warranty · buyback/exchange · privacy · dispute / jurisdiction clauses.

LAUNCH BLOCKER

Cancellation/refund procedural wording, grievance details, legal entity disclosures and formal jurisdiction language must be approved by Indian e-commerce counsel before the Terms page is published as final legal text.

EXECUTION SEQUENCE

Build in this order

Do not redesign the entire application in one unreviewed branch.

SPRINT 0 - FOUNDATION

Freeze routes and design tokens. Remove lab-grown customer copy/toggle/filter. Remove USD and generic US shipping/appraisal language. Remove placeholder testimonials. Fix dead links/socials. Build CTA/event helper.

SPRINT 1 - HOMEPAGE

Centred diamond/helix; House cards; Belief; How We Work; Why Natural; The Reason; Secret Proposal; Trust; Forever; real-question FAQ; campaign slots; final CTA/footer.

SPRINT 2 - THE PROPOSAL

Proposal landing; engagement listing; product detail; ONE OF ONE custom rings; proposal rings; secret guidance; shortlist.

SPRINT 3 - THE HOUSE

The Vow; The Chapters; Private Commission.

SPRINT 4 - TRUST & EDUCATION

Our House + founder note; Why Natural; How It Works; Craftsmanship; The Record; Diamond Guide; FAQs; Shipping.

SPRINT 5 - CONVERSION

Confirm Selection; 50/50 order flow; price/spec summary; order status; documentation downloads.

SPRINT 6 - CLIENT CARE

Talk to Us; Consultation; Aftercare; Buyback & Exchange; Returns; Warranty & Resizing.

SPRINT 7 - LEGAL / PRIVACY

Privacy and Terms shells wired to actual data flows. Insert counsel-reviewed production wording before launch.

SPRINT 8 - QA & LAUNCH

Responsive and reduced-motion QA, accessibility, performance, WebGL fallback, analytics verification, SEO/schema, error states, security/privacy review.

Do not improvise these behaviours

A page is not accepted because it looks similar. It is accepted when the experience and underlying action match the specification.

- Natural diamonds only in customer-facing product architecture. Remove laboratory-grown toggle/filter/copy from Bare Brilliant.
- Engagement-ring primary action is Start With This Design / Start Your Ring - not Add to Cart.
- Homepage diamond/helix remains the central signature visual.
- Do not use fake scarcity, countdown timers, red sale tape or compare-at pricing by default.
- Every visible CTA has a mapped route/action and analytics event.
- Do not build the engineered Bare Brief in this phase.
- Preserve source/intent/product context into /chat and consultation handoffs.
- Do not collect full address at enquiry stage or a friend's phone number for shortlist sharing.
- Product pages expose price breakup, dynamic design specifications and individual Why This Design Works copy.
- Policies shown on product/FAQ pages link to the formal policy pages and cannot silently conflict.
- Mobile and reduced-motion fallbacks are launch requirements, not future improvements.
- All final legal / cancellation / grievance wording must be counsel-reviewed before production publication.

What informed this specification

Benchmarks were used to understand hierarchy, trust anatomy and Indian customer expectations - not to copy another brand.

- Apple Human Interface Guidelines - Design Principles / Typography / Layout / Accessibility** Used for hierarchy, simplicity, legibility, restrained type system, consistency, touch targets and clarity.
- Tanishq product pages + Return Policy** Indian expectations for price breakup, product details, assurance and a 7-day domestic return benchmark.
- BlueStone FAQ / Why Buy From Us** Indian benchmark for lifetime exchange/buyback communication, current-market-value logic and return logistics.
- Cartier India product pages** Luxury benchmark for dimensions, material disclosure, variation notes, wishlist, ambassador contact and appointments.
- Tiffany engagement product experience** Benchmark for diamond decision controls and expert assistance.
- Brilliant Earth product pages** Benchmark for individual design-detail explanations, warranty/resizing reassurance and product-service integration.
- Bureau of Indian Standards - Hallmarking consumer FAQ** Invoice / hallmark / HUID trust requirements.
- Department of Consumer Affairs - Consumer Protection / E-Commerce Rules** Legal review framework for e-commerce disclosures and consumer terms.
- MeitY - Digital Personal Data Protection Rules 2025** Privacy / notice / data-handling review basis for the production policy and data architecture.

Important: Competitor policies are benchmarks, not legal templates. Bare Brilliant's production Terms, Privacy, cancellation/grievance clauses and final policy language should be reviewed for its exact seller entity, operating model and data flows before launch.

What the developer and designer should do next

This document is ready to execute page-by-page.

- Developer starts with Sprint 0, then builds the homepage before touching all downstream pages.
- Graphic designer starts the asset system in parallel: hero masters, product-angle templates, campaign/drop templates, ONE OF ONE process frames and educational graphics.
- Use the approval visuals for layout and safe zones; replace placeholders with approved product/campaign assets without moving the underlying grid.
- Review each sprint against its visual + exact copy + CTA map before merging to the main production branch.
- Do not begin the engineered Bare Brief until the main website experience is stable and live.
